AFVs in Emergencies

AFVs in Emergencies

- Alternative Fuel Vehicles
 - Diverse fleet allows for multiple options in the event of an emergency
 - Dedicated fueling source in many instances
- Example: Atlantic City Jitneys and Hurricane Sandy
 - Minibuses (“Jitneys”) run on natural gas used during Hurricane Sandy to perform critical services

AFV Tool for Emergency Planners

iREV Tracking Tool - 2016 Annual Merit R...

iREV Tracking Tool - Beta 1.0.0.44

iREV Home

Log Out

- iREV Tracking Tool
 - Allows emergency planners to visualize various AFV infrastructure assets and options at their disposal and simulate events
 - Users can upload data and export data to other platforms (e.g., ArcGIS)
- To access tool, register for an account at <http://irev.ctc.com>
